

QUALITROL 039

Remote electronic oil level indicators

Application

For continuous oil level indication with integrated control and alarm functions. Designed for use where the point of measurement is not easily viewed by personnel requiring separate or remote indication.

Features

- Up to 2 switches (contacts) for control and alarm functions
- 0-1 or 4-20mA continuous remote output for integration into SCADA systems
- Case sensor assembly (with dial) is designed for use with QUALITROL 032 or 042 oil level indicator flange styles for easy retrofit applications

Options

- 3 oil level indicator model for consolidation of 3 indications into one robust IP54 enclosure
- Float travel ranges from min to max markings for various tank configurations
- Tank connection (flange) style, materials, dial style and dial layout
- Heater for enclosure
- Up to 2 switches
