

QUALITROL 149 & AKM 47209 Small SF6 gas density monitors

Application

For SF6 gas density monitoring on circuit breakers to prevent dangerous low level of insulating gas during operation. Designed for use where only local indication is required.

Features

- Mechanical based local indication with optional bi-metal ambient temperature compensation
- Compact design for space restricted applications
- Rugged stainless steel case for long life

Options

- Pressure ranges
- Dial style and layout
- Tank connection type
