

QUALITROL 208/213/216 LPRD Large pressure relief devices

Application

For overpressure protection on oil filled transformers, load tap changers, and other related electrical apparatus.

Features

- QUALITROL pioneered dual gasket amplifies overpressure force for reliable operation and resealing
- Up to 2 latching or momentary switches for alarm and control
- Stainless steel hardware and operating valve, operation indication pin
- Stainless steel or aluminum with corrosion resistant hood finish and paint for long life

Options

- Operating pressure, gasket material and type, hood material, Indicator style and color
- Up to 2 latching or momentary switches (single or double pole form C, high DC, or low current gold contacts)
- Electrical connection style
- Gas bleed system
- Directional shield for controlling hot oil and gas discharge
