

QUALITROL 900/910 RPRR

Rapid pressure rise relays

Application

For transformer and other electrical apparatus protection. Device sends an alarm when a dangerous sudden pressure rise condition has occurred. This alarm can be used to trip the transformer offline preventing further damage or purely as an indicator of an event.

Features

- QUALITROL pioneered standard in detection and alarming of destructive sudden pressure events
- Models designed for use in oil or gas space
- 100% tested for pressure rate release point

Options

- Horizontal or vertical mounting
- Seal in relay (QUALITROL 909) for latching alarm or trip signal
- Electrical connection types, cable size, lengths and wire colors
- Gas bleed system
- Field test kit (KIT-013) and factory test fixture (FIX-601)
- Flange or thread mounting
